And other ingredients

Ref: Saw Palmetto,

Bangladesh National Unani Formulary.

Unani Medicine

Description:

Saw palmetto is small size palm grouped plant. Standardized dry extract of fruit is used in medicinal preparation. It mainly contains fatty oils, phytosterols like isoquercetine, roafeline; polysaccharide like urenic acid containing galactoarabane and free fatty acids. This is effectively being used in prostatic Hyperplasia.

Indication:

Saw palmetto extract is the most popular herbal treatment for Polyuria, Desire of pervading, Bedwetting, Dysuria, Symptom of benign prostatic enlargement stage-1 & Inactivity of Urinary bladder, Incontinence of Urine, Symptom of Benign Prostatic enlargement stage-2. It is also anti-androgenic, anti-exudative, anti-estrogenic and anti-inflammatory.

Pharmacology:

Animal studies show that saw palmetto inhibits the growth of tumor cells, indicating that it may be helpful in the treatment of prostate cancer. Other studies show that saw palmetto improves urinary tract symptoms related to BPH. Saw palmetto doesn't shrink the overall size of the prostate, but it seems to shrink the inner lining that puts pressure on the tubes that carry urine.

Dosage:

1capsule 2 times daily or as directed by the physicians.
