Glycyrrhiza glabra (liquorice Ext.) 0.50 gm

And other ingredients (Ref: Glycin, B.N.U.F)

Unani Medicine

Description:

Glyrex® is a natural combination of medicinal herbs to provide quick relief from hyperacidity, peptic ulcer, duodenal ulcer and gastric pain. It is effective and well tolerated.

Glycyrrhiza glabra and Glycyrrhiza glabra Extract: Is the main ingredients of **Glyrex®**. Liquorice and Liquorice extract are demulcent, laxative and expectorant. Liquorice relieves discomfort of the stomach & remove the irritating effects of acids in a better way than alkalies.

It has the ability to release endogenous secretion, which is potential mediator of the anti-ulcer actions and shown to accelerate the healing of ulcer.

Indication:

Hyperacidity, Peptic ulcer, Duodenal ulcer & Gastric pain.

Dosage:

One Sachet twice daily before meal with water or as directed by the physician.

Contraindication:

There is no known contraindication.

Side effect :

No Significant side effect has been obsrved.

Use during Pregnancy & Lactation:

Glyrex® does not cause any problem in pregnancy & Lactation.
