and other ingredients

(Ref: Sufoof Mundamil, B.N.U.F) **Unani Medicine**

### Description :

***Plantago ovata* (Isapghul):** Biological experiments have proved that the mucilage forms of Isapghul coating over the surface of the ulcers. Used as a popular remedy in chronic amoebic & bacillary dysentery, intestinal fluxes, other inflammatory and functional derangements of the digestive organs and febrile conditions. It is demulcent and lubricant. The lubricating part of the mucilage increases the bulk of the intestinal contents, which mechanically stimulates the intestinal peristalsis and relieves constipation.

***Ocimum album* (Tulshi seed):**

Seeds contains large amount of mucilage. Useful in dysentery, parasiticide and antiseptic.

***Pistacia lentiscus* (Rumi mastogi):**

It proven that Rumi mastogi is ulcer protective. The amaroids and essential oil are astringent and aromatic. Rumi mastogi resin was formerly used in freshen the breath.

***Calcium carbonate:***

Administered internally neutralizes the free acids of the gastric juice, useful in dyspepsia due to acidity of the stomach and to check sour eructation, abrasion, burn & inflammation. It is fresh relief and most gratifying coolness. In purulent discharges from ulcers it brings about a healthy action and lessens the discharge.

***Vateria indicia* (kahruba):**

kahruba is emollient and stimulant. It is good for ulceration, painful affection & inflammation.
